

fliwer®

in collaboration with

and VONDOM® presents:

## THE GARDEN OF THE FUTURE

**FLIWER**, the most innovative technological system for garden care, with the collaboration of large companies in gardening as **COMPO**, **SEMILLAS FITÓ** and **VONDOM** are pleased to invite you to the show-room, The garden of the future.

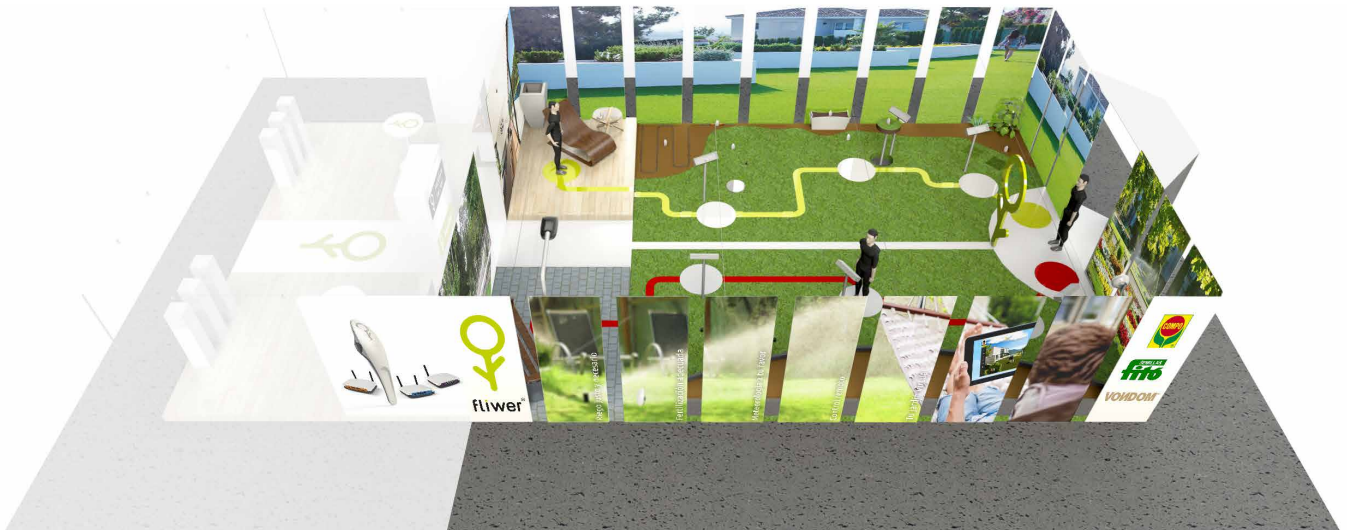

Come to visit us and know the evolution that is about to experience the world of gardening, walking through our showroom you will experience the benefits that give the new products that will revolutionize the world of gardening.

The show-room, the garden of the future, is designed to link the garden with the different actors who take care of it, from the end user, gardener, technician, landscaper to the garden center and shop. The idea is to provide the garden what it needs when it's needed and maintain communication with the different actors involved, in order to keep it in optimum status saving resources and money.

From the choice of the plant species that is best for the different areas of your garden, the seed and best varieties selection, choosing the right fertilizer, control of environmental parameters and meteorology, the proper irrigation management, total control of the garden, on any device connected to the Internet from the best garden furniture to make the user enjoy their domestic nature.

We want you to participate, interact and try these new products so that you can understand how they work and the benefits they can bring to you. We are convinced that you will live a great experience thanks to products that are setting trends and revolutionize the world of gardening.

¡Join the future gardening! ¡We are waiting for you!
